

TIME TO SHINE

SHINESHIELD™ DISINFECTION SERVICES

Calgary's #1 Provider of Janitorial & Cleaning Services For Businesses

WHAT IS SHINESHIELD™ ?

ShineShield™ introduces businesses to the science of disinfection and is exclusively available through Time To Shine Cleaning Services.

Our ShineShield™ solution is the most advanced disinfection service available to businesses today. Our process ensures complete disinfection, destroying 99.9% of harmful pathogens. It is 100% safe for the environment without any risk to human health.

Combining the latest in electrostatic technology with category IV disinfectants, ShineShield™ is the leading process that ensures a superior clean, fully disinfected, healthy and safe environment.

HOW DOES SHINESHIELD™ WORK?

Electrostatic disinfection involves spraying electrostatically charged disinfectants throughout the environment onto surfaces and objects. The particulate mist is positively charged making it easy to adhere and evenly spread to all surfaces. Once the mist is applied to a surface, it uniformly disperses the disinfectant. The particles subsequently maintain their cationic charges for a short period of time, ensuring complete disinfection of all surfaces in which the mist comes into contact.

WHAT ARE THE BENEFITS OF SHINESHIELD™ ?

Utilizing electrostatic technology is the leading process in delivering a safe, clean, and completely disinfected environment today. The ShineShield™ solution provides our clients with an unmatched service that ensures complete disinfection coverage, inclusive of the following benefits:

Complete Disinfection

Total disinfection of the business, removing 99.9% of harmful pathogens on all surfaces.

Touchless Application

Elimination of cross-contamination as opposed to other technologies and traditional disinfection methods.

Safe & Eco-Friendly

Completely safe for humans and eco-friendly to the environment, without damage to furniture, technology, equipment, or structure.

Your Best Option

A solution that is economical and effective in delivering a safe and pathogen-free environment that outperforms generic trigger sprayers and foggers.
